

Christopher Diaz

Cybersecurity Analyst | CompTIA CySA+ | SIEM | Threat Detection | SOC | Incident Response | Vulnerability Assessment

3472800875 ◇ christopher.diaz87@yahoo.com ◇ New York, NY ◇ [LinkedIn](#) ◇ [GitHub](#)

PROFESSIONAL SUMMARY

Cybersecurity analyst with hands-on experience in SIEM monitoring, threat detection, and incident response gained through immersive SOC training programs. CompTIA CySA+ certified with experience analyzing security logs, investigating alerts, and identifying indicators of compromise using tools such as Splunk, Wireshark, and Nmap. Background in federal security operations and investigations, bringing strong analytical skills, incident documentation discipline, and risk-based decision making to security operations environments. Seeking to contribute to a Tier 1 SOC Analyst role focused on threat monitoring and incident response.

CERTIFICATIONS

CompTIA CySA+ - 2026

Splunk Core Certified User - 2026

TECHNICAL SKILLS

Security Operations & Monitoring: Alert Triage, Incident Response, Log Analysis, SIEM (Splunk)

Security Tools: Wireshark, Nmap, OpenVAS, Sysinternals, Metasploit (Basic)

Systems & Platforms: Windows, Linux, Virtual Machines, Active Directory (Basic), AWS

Networking & Security Concepts: TCP/IP, Network Traffic Analysis, IDS/IPS Concepts, Vulnerability Assessment

Frameworks & Methodologies: MITRE ATT&CK Framework, Cyber Kill Chain Framework, NIST Cybersecurity Framework (CSF), Incident Response Lifecycle

Scripting: Python (Basic)

TECHNICAL TRAINING

Per Scholas – Cybersecurity Analyst Program

Nov 2025 – Mar 2026

- Monitored and investigated security alerts in Splunk SIEM within simulated SOC environments.
- Performed log and packet analysis (Windows/Linux) to identify indicators of compromise (IOCs).
- Conducted reconnaissance and vulnerability discovery (Nmap) and documented findings for escalation.

The Knowledge House – Cybersecurity Fellowship

Feb 2026 – Present

- Focused on SOC fundamentals: threat detection, incident response workflows, and virtual lab builds.
- Applied governance and logging best practices (CIA Triad, AAA) and produced incident documentation.

CyberSkills2Work – Security Control Assessor / Vulnerability Assessment Analyst Program

University of Arizona

Mar 2026 – Present

- Security Control Assessor / Vulnerability Assessment Analyst training (NICE alignment).
- Reviewed system security plans (SSPs) and performed entry-level scan result review and control assessment documentation.

ADDITIONAL CYBERSECURITY TRAINING

Mastercard — Cybersecurity Job Simulation (Forge)

Phishing investigation and analyst workflow simulation.

TryHackMe — Advent of Cyber 2025

Hands-on labs covering alert triage and log analysis.

Cisco Networking Academy — Network Defense / Endpoint Security / CyberOps

Defensive security training covering SOC monitoring and endpoint protection.

Purdue University Northwest — Cybersecurity System Administration Certificate

Windows & Linux administration with SOC-focused security operations.

UC Davis Continuing & Professional Education — Secure Programming Camp

Secure coding principles and vulnerability analysis.

PROJECTS

Phishing Email Analysis [Link](#)

- Investigated SPF/DKIM/DMARC, analyzed redirect chains (urlscan.io), and documented IOCs and remediation steps in a structured analysis report (artifacts stored in GitHub).

PROFESSIONAL EXPERIENCE

Customs and Border Protection Officer

May '19 — Sep '25

U.S. Customs and Border Protection

Queens, NY

- Conducted risk-based screening and investigations to identify security threats at ports of entry.
- Analyzed intelligence indicators and behavioral patterns to support threat identification and escalation.
- Maintained detailed incident documentation and produced defensible reports for interagency coordination.
- Operated in high-pressure environments requiring fast, risk-based decision making.

Border Patrol Agent Trainee

Aug '18 — Nov '18

U.S. Customs and Border Protection

Tucson, AZ

- Monitored electronic detection systems and responded to risk alerts using structured evaluation processes.
- Assessed behavioral and environmental risk indicators before initiating enforcement actions.
- Documented investigative findings in formal reporting systems.
- Followed strict procedural controls to ensure defensible and policy-aligned outcomes.

Security Officer

Nov '17 — May '19

KH Security

Queens, NY

- Enforced access control procedures and documented security incidents in alignment with company policies.
- Identified procedural gaps and reinforced adherence to compliance standards.

Public Safety Officer

May '18 — Aug '18

Roosevelt Island Public Safety Department

NY, NY

- Responded to incidents, conducted investigations, and documented incident reports for operational records.
- Coordinated responses with police, fire, and EMS; maintained situational awareness and incident logs.

Security Officer

Dec '17 — Apr '18

Titus Security

Bronx, NY

- Maintained accurate activity logs and incident reports to support internal review and investigations.
- Escalated risks appropriately based on severity and defined protocols.

Special Event Officer (Part-time)

Sep '17 — Feb '18

Securtias

Bronx, NY

- Enforced formal access control procedures in high-traffic environments with strict adherence to venue safety policies.
- Operated in structured, compliance-driven environments requiring professionalism and procedural consistency.

Shift Supervisor

Jan '13 — Sep '17

Rite Aid

Bronx, NY

- Supervised operations in a high-volume retail environment with accountability for financial controls.
- Conducted inventory audits and reconciliations, identifying discrepancies and documenting findings.
- Ensured compliance with corporate policies and loss-prevention controls.
- Escalated financial or operational irregularities to senior management.

Network Technician Internship

Jan '14 — Feb '14

Technology Sandbox

Bronx, NY

- Supported network infrastructure installation and configuration.
- Assisted with domain administration and user access management.
- Diagnosed and resolved Windows-based connectivity issues.
- Documented troubleshooting steps and escalated complex issues.

EDUCATION

Associate of Applied Science in Computer Programming, Wood Tobe-Coburn School (GPA: 3.34)

Sep '12 — Jan '14

- Studied object-oriented programming, debugging, and structured problem-solving methodologies.
- Developed applications using Java and Visual Basic in lab-based environments.

PROFESSIONAL AFFILIATIONS

Member - ALPFA

VOLUNTEERING

Auxiliary Police Officer, NYPD

Bronx, NY

Feb '17 — Sep '24

- Conducted routine patrol support and documented incident reports.
- Escalated safety concerns through formal reporting channels in accordance with established protocols.
