PROFESSIONAL SUMMARY

Early-career AI builder and career changer who ships end to end. Over the past year, designed and deployed a live LLM app (Gemini, with logins, a database, and payments), an AI agent on the Model Context Protocol, and a handful of automation pipelines, and got good at explaining how they work to non-technical folks. Looking for a role in applied AI or AI solutions engineering.

TECHNICAL SKILLS

AI & LLM: LLM application design (Claude, Gemini), prompt engineering, agentic workflows (Model Context Protocol), grounded generation, AI automation (n8n), AI/ML security (prompt-injection defense, securing GenAI APIs)
Full-Stack & APIs: Python, JavaScript, React / Next.js, Node.js, REST APIs, webhooks, SQL (Postgres)
Cloud & Tooling: Docker, AWS, Vercel, Git/GitHub, serverless functions, Clerk (auth), Stripe (payments)
Communication: Explaining technical concepts to non-technical stakeholders, documentation, live demos

PROJECTS

CyberBrief, Production LLM Web App (live at cyberbrief.dev) View App

- Designed and shipped a full-stack Next.js app on Vercel that uses the Gemini API with Google Search grounding to summarize and classify content, with API keys kept server-side and retry/back-off handling.
- Built the product around it solo: Clerk auth, a Neon Postgres database, Stripe free and Pro tiers, and serverless API routes.

Autonomous AI Orchestration Agent View Project

- Built a Python agent on the Model Context Protocol that runs tools, reads their output, and acts on it, with a human approval step before anything high-impact.

AI Automation Pipeline View Project

- Built an n8n workflow that takes in data over a webhook, calls Claude to classify it, and logs structured results, turning a manual process into a repeatable one.

EXPERIENCE

Full-Time Building & Training, Career Transition Sep 2025 – Present

- Shipped the projects above while training full-time (The Knowledge House, Per Scholas, Stanford Code in Place).

Customs and Border Protection Officer, U.S. Customs and Border Protection Aug 2018 – Sep 2025
Queens, NY

- Six years of federal service making fast, high-stakes decisions under pressure, coordinating across agencies, and keeping clear records.

EDUCATION

B.S. in Information Science, CUNY SPS Expected June 2028

A.A.S. in Computer Programming, Wood Tobe-Coburn 2012 – 2014

Competitions: Bloomberg × TKH CTF 2026, 1st Place (all 27 levels, including prompt-injection and AI-security challenges); DevSecCon25, Rank #5.
